

## ABSTRACT

A device capable of creating a sentence having decoration information with a simple operation. The device includes: an input unit for entering a sentence in text format by a user; a display unit for displaying an image and a sentence in text format; a decoration information table for storing combinations of decoration information; a decoration information detection unit for detecting the optimal combination of decoration information in the decoration information table in accordance with a request from the user; and a decoration information addition unit for adding to a sentence the combination of decoration information detected by the decoration information detection unit. By storing combinations of decoration information in advance and allowing the user to select a theme or the like when entering a sentence, a plurality of items of decoration information can be added to a sentence.
